

PERIOPERATIVE & REGENERATIVE  
**ACUTE PAIN THERAPIES**

We offer Ketamine, TMS & ECT for treatment-resistant depression.

## **PSYCHIATRISTS**

### **Interventional Psychiatry for Refractory Conditions**

Acute Pain Therapies & Bellevue Ketamine was one of the first ketamine infusion clinics established in the state of Washington. Through our years of experience, we have refined our protocols to successfully treat a variety of conditions. We use IV infusions of Ketamine and adjuncts to successfully treat depression, anxiety, PTSD, and certain chronic pain conditions, where other modalities have failed. Our physician lead care team and our facility have the capacity to run 10 infusions simultaneously. We collaborate with Psychiatrists and other providers who treat treatment resistant depression.

We have hired a Psychiatrist, Dr. Molly Davis, who will bring ECT and TMS to our clinic starting mid-2022.

We have the highest standard for safety with board certified Anesthesiologists on site, remote central monitoring, ACLS certified staff, and all emergency equipment available if needed.

*We recommend scheduling a referral through our website at **[AcutePainTherapies.com](https://AcutePainTherapies.com)**.*
